

HJ-540 & HJ-541

Fiber Optic Clamp

Description:

Fiber optic clamp is designed for tension flat FTTH fiber optic cable or drop wire cable in FTTX construction or telephone drop wires. It is very easy for installation, and it does not require additional tools, handily adjusted metal hook allows simple installation on cross-arm or suspension brackets, and FTTH hooks as well. The plastic clip provides the excellent adherence with cable and insures the reliable fixation.

Features:

1. Hooks are made of stainless steel, which ensure long-time using on outdoor application.
2. Good anti-corrosion and anti-aging performance.
3. Easy installation.
4. Durable.
5. It is effective and time-saving for cabling.

Item No.	Application	Material
